Career Objective

Motivated Computer Science Engineering undergraduate with hands-on experience in programming, web development, and database systems. Actively building real-world projects and participating in hackathons, seeking internship and skill-development opportunities in software engineering.

Education

Bachelor of Engineering – Computer Science and Engineering 2024 – 2028 (Expected)

Sri Sairam Engineering College, Chennai

Currently pursuing 2nd year(IV Sem)

CGPA : 9.13

Higher Secondary Education (Class XII) 2024

Government Higher Secondary School, Marakkanam, Villupuram

Score: 88.83%

Secondary School Education (Class X) 2022

Government Higher Secondary School, Marakkanam, Villupuram

Score: 96.4%

Technical Skills

- **Programming Languages:** Python (Intermediate), C, Java
- **Web Development:** HTML5, CSS3, JavaScript, React, Next.js, FastAPI, Node.js
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Version Control:** Git, GitHub, BitBucket
- **Core CS Fundamentals:** Data Structures (Basic), Object-Oriented Programming, DBMS, Operating Systems
- **Tools:** VS Code, Jupyter Notebook, Antigravity, Docker Desktop, PGAdmin, Prisma

Projects

PromptForge – AI Prompt Engineering and Collaboration Platform

Project Repository

- Designed and developed a web platform for discovering, sharing, and managing high-quality AI prompts for real-world applications.
- Implemented features for creating, editing, forking, and bookmarking prompts, enabling collaborative prompt engineering among developers.
- Built a personalized user profile system with analytics including prompt activity graphs, reputation scoring, and contribution statistics.
- Integrated dual authentication methods (Google OAuth and email/password) with automatic avatar generation and editable user profiles.
- Developed interactive UI components including 3D hero sections, prompt visualization, and responsive dashboards for an engaging user experience.

- **Tech Stack:** React, Next.js, TypeScript, Tailwind CSS, Three.js, Supabase/PostgreSQL, Git, GitHub

Student Internship and Management System – Internship Lifecycle and Attendance Management Platform

Project Repository

- Designed and developed a centralized web-based platform to manage the complete lifecycle of student internships including student onboarding, project allocation, internship activation, and completion tracking.
- Built a barcode-based attendance system enabling batch scanning of student ID cards for fast and reliable internship attendance tracking with duplicate prevention and database integrity constraints.
- Developed internship lifecycle management with state transitions (pending, active, completed) and extension milestone tracking to monitor internship duration changes and maintain historical extension records.
- Engineered a structured RESTful backend API architecture supporting student management, project assignment, internship tracking, attendance recording, and administrative operations.
- Designed a scalable PostgreSQL database schema supporting relationships between students, projects, internships, attendance records, and extension histories.
- Implemented secure authentication and authorization using JWT tokens with protected API endpoints for administrative access control.
- **Tech Stack:** FastAPI, Python, PostgreSQL, Next.js, TypeScript, Tailwind CSS, AWS S3, ReportLab, JWT Authentication, Git, GitHub

Expense Tracker – Personal Finance Management Web Application

Project Repository

- Developed a web-based application to record, categorize, and track daily expenses efficiently.
- Implemented features for adding, editing, and deleting expense records with real-time updates.
- Enabled expense categorization to help users analyze spending patterns.
- Designed a simple and intuitive user interface for seamless personal finance management.
- **Tech Stack:** HTML, CSS, JavaScript, Supabase/PostgreSQL, Git, GitHub

Toursafe – Tourist Safety and Incident Reporting Platform

Client Repository — Authority Repository

- Developed a web application enabling tourists to report incidents and connect with verified authorities.
- Implemented separate user and authority dashboards with role-based access.
- Designed structured workflows for issue reporting and resolution.
- **Tech Stack:** HTML, CSS, JavaScript, REST APIs, Git, GitHub

Crowdsourced Civic Issue Reporting and Resolution System

GitHub Repository

- Developed a platform for citizens to report civic issues with category and location tagging.
- Enabled issue tracking to support faster resolution through public participation.
- Emphasized clean user interface and organized backend data handling.

- **Tech Stack:** HTML, CSS, JavaScript, Python, SQL

Certifications

- Cisco Python Essentials 1 and 2, Networking Devices and Basic Configuragtion.
- IBM – SQL and Relational Databases 101, Python 101 for Data Science
- NPTEL – Joy of Computing Using Python, Programming in Java
- UDEMY - Java OOP (Andril Partola, ITER Academy)
- La Wagon – Git and GitHub
- IIT Bombay Spoken Tutorial – Python and C
- Duolingo Hindi Score: 15 (Elementary Proficiency)

Hackathons and Competitions

- IEEE Xtreme 18.0 and 19.0 – Global Rank 3000 worldwide
- Finalist – IBM SkillsBuild Hackathon (24-hour national-level hackathon)
- Finalist – IdeaXchange Hackathon, VIT Chennai
- Finalist – Mumbai Hacks 2025
- Participant – Bharatiya Antariksh Hackathon 2025

Extracurricular and Volunteering

- Active Unnat Bharat Abhiyan (UBA) Volunteer
- YUCI Student Member
- Content Creator and Video Editor
- Blood Donor and Community Volunteer
- Tutoring high school students in Mathematics, Physics and NMMS Examination Preparation.

Achievements and Sports

- State-level Boxer – Gold and Silver medalist
- District-level Football Winner
- Athletics – Long-distance runner, Shot Put and Discus Throw

Languages Known

English, Hindi, Tamil
